

Diabetes Monitoring Chart

Date: _____

Name: _____

Blood Glucose Readings	Time	Units of Insulin (#)	Blood Glucose Level	Notes on Behaviour (thirst, urination, food given, appetite)
0 hours - Time of 1 st insulin dose of the day				
2 hours post insulin				
4 hours post insulin				
6 hours post insulin				
8 hours post insulin				
10 hours post insulin				
12 hours post insulin - second dose of insulin if 2x daily				

Please start your monitoring chart at the time of your pet's first dose of insulin. Start with getting a blood glucose (sugar) reading, then administer the insulin and follow the chart. The curve will finish at the 12-hour mark - if your pet is receiving the insulin twice daily, this will also time with your second administration of insulin. Please email the completed chart to info@ildertonpethospital.com and our veterinarian will review and follow up with you. If you are struggling to collect blood samples from your pet, the most important numbers we need are the 0, 4, 6 and 12-hour readings. Please do not hesitate to contact us with any questions or concerns you may have at 519-666-2288.
